

HTML

REPORT

OVERVIEW:

This is dynamic website which gives all the information about a book store, helps the user to find books of their choice with little bit of introduction about the book with ease.

The website has been developed in HTML, JSP and HTML is a markup language which is in reality a backbone of any site, every site can't structured without the knowledge of html.

If we make our web page only with the help of html, than we can't add many of the effective features in a web page, for making a web page more effective we use various platforms such as JSP.

So here we are using these entire features to make our web pages more effective as well as efficient.

And to make our web pages dynamic we are using JSP here.
